# otimo

OPTIMIZED CONCRETE

"Otimo" the new generation of optimized concrete products by ML Ready Mix Concrete, designed to meet the demands of today's construction industry. Otimo, Latin for the very best solution", which is exactly what you need to get your job done right. With a variety of solutions for every project, from fast setting concrete to architectural concrete. Your only choice for better concrete.

## Artico

The revolution in winter concrete, quit wasting time playing in the snow, it's time to get the job done. ML Ready Mix Concrete's Artico is the solution for our Canadian cold winters that really put a damper on our construction schedule. Artico achieves predictable set-times that allow your schedule to move forward along with improved surface appearance and finishing characteristics.

## Beleza

Enhanced decorative materials that keep all the advantages of concrete. Available in an array of amazing colours, patterns and textures, Beleza's subtle designs bring any area of your project to life with colour and realistic texture.

## Duro

Duro concrete accelerates construction schedules by achieving rapid high early strength without affecting normal placement procedures. Workability ranges from 90 to 120 minutes from batching time. Stripping strength can be achieved as early as 12 hours.

## Fibra

Fiber reinforced concrete has many great advantages to the performance and structural integrity of your concrete. Fibra is designed to minimize cracking that is caused from plastic and drying shrinkage. When added to concrete it can improve the durability and life span of your concrete up to 25% as it improves the overall cohesion.

## Fluxo

Fluxo the ultimate in plastized concrete, the perfect touch to any mix. This carefully formulated mix enhances everything about concrete, increased strengths and durability while giving you a better finish and workability. Fluxo's workability cycle is longer than most plastized concrete, eliminate the waiting time of mixing onsite and burnt concrete. Increase your productivity and ease of placement with Fluxo.

## Sauve

Self Consolidating Concrete (SCC). Setting a new standard for cast in place concrete. Our highly flowable concrete mixes will spread into place under their own weight and achieve outstanding consolidation with minimal vibration. Sauve is ideal for vertical and horizontal flatwork or in areas with high concentration of steel reinforcement.

## Concrete Ordering Tips

ML Ready Mix Concrete is committed to providing the highest level of customer service and product quality. We recommend using the tips below to guarantee you the customer satisfaction you deserve.

**Placing Order**

We prefer that all orders are placed by telephone, fax, or email. Orders that are given over the radio will not be accepted unless it is a balance to an existing order.

**Advance Notice**

In order to provide our customers with the best possible service, it is important to place orders by 3:00pm the day before the concrete is required.

**Quantity & Rate**

In order to provide timely service, we must know the quantity of concrete and the required placement rate per hour.

**Communication**

It is important to communicate with dispatch of any delays or changes to the original order.

**Order Cancellations**

When trying to cancel or place orders on hold, it will only be possible if the order has not been loaded.

**Will Call Orders**

Will call orders will be only be scheduled into the days workload when confirmed.

**Confirmed Orders**

All first-round orders must be placed as confirmed order.

**Preparation**

It is important to organize and prepare the site for each concrete delivery to ensure quality service everytime.

It is the customer's responsibility to provide qualified flagmen and/or bucket personnel.

A suitable washout area for the concrete trucks must be supplied by the customer.

**Dispatch Hours**

Hours for placing concrete orders are 7:00am to 5:00pm, Monday to Friday.

Orders given after 4:00pm will be scheduled as truck availability permits.
